SUMMARY

Passionate Computer Science graduate with solid capabilities in HTML, CSS, JavaScript, React.js, and Python. Aspiring to begin a career in a progressive company, utilizing technical skills, adapting swiftly, and making meaningful contributions to practical projects.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Bootstrap
- **Backend:** Python, Flask, REST API development
- **database skills:** SQL
- **Tools and technologies:** Git and GitHub, VS Code

INTERNSHIP

python intern

Thirshika | chennai, India | Jul 2025-Aug 2025

- Coordinated daily tasks with team to enhance project execution efficiency.
 - Developed Python scripts that automated data processing and increased productivity.
 - Designed custom web applications utilizing Django and Flask frameworks.
- Created visually appealing front-end components for user engagement.

EDUCATION

Bachelor of Engineering: Computer Science

Arunachala College of Enginnering For Women | Kannyakumari | June 2024

Higher Secondary: Maths Computer

Sree RamaKrishna Matric Hr Sec School | Kannyakumari | May 2020

Secondary School

Sree RamaKrishna Matric Hr Sec School | Kannyakumari | May 2018

CERTIFICATIONS

Full Stack Development

- Gained practical experience in HTML, CSS, JavaScript, React.js, and Python.
- Learned backend concepts including APIs, databases, and server-side programming.
- Developed strong problem-solving, debugging, and project-building skills through real-time tasks.

WEBSITES

- www.linkedin.com/in/thirshika-k-75653a30b

PROJECTS

Healthcare dashboard project

- developed a responsive healthcare dashboard to display patient vitals, such as heart rate, temperature, and blood pressure
- Designed clear visual charts and UI components to improve user understanding, and focused on enhancing data visibility for faster healthcare decision-making
- Link: <https://v0-healthcare-consultation-website-six.vercel.app/>

Applying a random forest algorithm for classification of diabetic retinopathy

- developed a machine learning model using random forest to classify diabetic retinopathy from retinal images
- Performed data preprocessing, image normalization, and extracted relevant features for classification, tuned hyperparameters to improve accuracy, and validated results with cross-validation techniques, used • Python, NumPy, Pandas, Matplotlib, and Jupyter Notebook
- Strengthened understanding of supervised learning and medical image analysis
